

Cyrus Clemensen

Associate Director of Technology

Cyrus Clemensen is Associate Director of Technology at the Wonderfactory. In this role, he oversees the Technology and IT departments of the company. He's also a huge advocate of open source technologies, and continues to be an avid beer and wine maker in his spare time....yes you read that right!

Prior to joining the Wonderfactory, Cyrus held multiple roles as chief architect, lead developer, and head of web services for a variety of internet start-ups and media companies.

As head of web services at Enamics, a company on the forefront of defining the convergence of business and technology, Cyrus led and oversaw the successful execution Enamics' multiple web platforms, as well as their online community. Enamics clients included companies like Northrop Grumman and Pepsi Co.

Prior to Enamics, Cyrus worked at Bartle Bogle & Haggerty, and global ad agency based in the UK. Here he spearheaded an initiative to roll out an asset management platform for all offices, as well as managing web development for clients like Levi Strauss, Sony, Esupee, and Johnny Walker.

Before coming to BBH, Cyrus worked as a Senior Implementation Designer for a company named Quidnunc (What's Next?). Here he was responsible for architecting a developing a portion of JetBlue's first e-commerce transaction site, as well as working for other clients such as Microsoft, Clubmom, and Goldman Sachs.

Cyrus is a graduate of the University of Vermont and resides in Fairfield, CT with his wife and son.
